

SRINIVASULA LAKSHMI TEJASWI

Vijayawada, Andhra Pradesh, India

tejaswisrinivasula17@gmail.com — +91-9392220296 — GitHub — LinkedIn

SUMMARY

Data Analyst with hands-on experience in SQL, Python, Excel, Power BI, and Machine Learning through analytics-focused projects involving customer behavior analysis, business intelligence reporting, dashboard development, sentiment analysis, and predictive analytics. Skilled in data cleaning, exploratory data analysis (EDA), KPI tracking, statistical analysis, and transforming complex datasets into actionable business insights that support data-driven decision-making.

SKILLS

Data Analysis: Data Cleaning, Data Validation, Data Transformation, Exploratory Data Analysis (EDA), Statistical Analysis, Trend Analysis, KPI Tracking, Root Cause Analysis, Predictive Analytics

Programming & Databases: Python, Pandas, NumPy, Scikit-learn, SQL, Joins, Subqueries, CTEs, Aggregations, Relational Databases

Visualization & Reporting: Power BI, DAX, Power Query, Excel, Dashboard Development, Business Intelligence Reporting, Interactive Reporting, Data Visualization, KPI Tracking

Tools: GitHub, Flask

PROJECT EXPERIENCE

Customer Behavior and Premium Subscription Analysis

Python — SQL — Power BI

- Analyzed survey and customer review datasets across Spotify, YouTube Music, Gaana, Wynk, and JioSaavn to identify premium subscription drivers and retention factors.
- Performed data cleaning, preprocessing, validation, and exploratory data analysis using Python and SQL to uncover customer behavior trends and churn indicators.
- Conducted sentiment analysis on customer reviews to identify recurring complaints, pricing concerns, and feature adoption patterns.
- Built interactive Power BI dashboards presenting KPIs, engagement metrics, conversion trends, and business recommendations.

Chinook Music Sales Dashboard

Power BI — SQL — DAX

- Analyzed 22,000+ invoice line records across multiple relational tables to evaluate revenue performance and customer purchasing behavior.
- Performed SQL-based analysis to identify sales trends, high-value customers, and genre-level performance metrics.
- Developed interactive Power BI dashboards using custom DAX measures for KPI tracking, revenue reporting, and customer insights.
- Designed relational data models and Date Tables supporting time-series analysis and business intelligence reporting.

Flood Prediction and Early Warning Analytics System

Python — Machine Learning — EDA

- Cleaned and transformed environmental datasets through preprocessing, missing value treatment, outlier handling, and feature engineering.
- Conducted exploratory data analysis and correlation analysis to identify flood risk indicators.
- Built and evaluated machine learning classification models for flood prediction using Accuracy and ROC-AUC metrics.
- Generated predictive insights supporting disaster preparedness and early warning decision-making.

CycleAware - Cycling Behaviour and Risk Analysis

Python — Flask — Machine Learning

- Performed data preprocessing, feature analysis, and exploratory data analysis on cycling-related datasets.
- Identified rider behavior patterns and risk factors through analytical modeling techniques.
- Applied predictive analytics for cycling safety assessment and risk classification.
- Integrated machine learning models into a Flask-based application enabling real-time risk monitoring.

EDUCATION

Master of Computer Applications (MCA)

KL University, Vijayawada

Apr 2026

CGPA: 9.23

Bachelor of Science (MCS)

KBN College, Vijayawada

2024

CGPA: 7.32
